

JUAN CARLOS ARRIETA RINCÓN

Senior .NET Full Stack Developer | Software Architect | Cloud Solutions Engineer

Maracaibo, Venezuela | +58 (424) 504-3227 | juan.arrieta.r@outlook.com

LinkedIn: [linkedin.com/in/arrietadev](https://www.linkedin.com/in/arrietadev) | GitHub: github.com/arrietadev | Portfolio: arrietadev.github.io

PROFESSIONAL PROFILE

Senior Software Engineer and Software Architect with 15+ years of experience delivering **scalable .NET, Azure, backend, API, database, and cross-platform mobile solutions**. Strong track record modernizing legacy platforms, designing cloud-native architectures, improving application performance, and establishing engineering quality standards. Experienced working across the full delivery lifecycle - architecture, implementation, testing, CI/CD, security, observability, and technical mentoring - with measurable results in performance, reliability, deployment speed, and software quality.

SELECTED IMPACT

- Led 15+ .NET Framework to .NET Core migrations with 20-30% performance improvements.
- Architected REST APIs supporting 5,000+ concurrent users without service degradation.
- Reduced SQL Server query response time by 68% (2.5s to 800ms) through performance tuning.
- Reduced deployment time by 87% (2 hours to 15 minutes) through CI/CD automation.
- Reduced mobile crash rate from 8% to 0.3% and maintained a 92% approval rate across AI-generated code audits.

CORE TECHNICAL EXPERTISE

Languages & Frameworks: C#, .NET Framework, .NET 6/7/8, ASP.NET Core, .NET MAUI, Xamarin.Forms, Python, VB.NET, JavaScript, TypeScript, SQL

Architecture: Clean Architecture, Hexagonal Architecture, SOLID, DDD, Microservices, Event-Driven Architecture, RESTful API Design, Design Patterns, Dependency Injection

Azure & Cloud: Azure App Service, Azure Functions, Azure Container Instances, Azure SQL Database, Cosmos DB, Azure Storage, Service Bus, Event Grid, Azure DevOps, Azure Pipelines

DevOps & Containers: Docker, multi-stage builds, Azure Container Registry (ACR), CI/CD, GitHub, Azure Repos, blue-green deployments, canary releases, Application Insights

Data: SQL Server, advanced T-SQL, stored procedures, query optimization, index tuning, execution plans, EF Core 6/7/8, LINQ, SQLite, Cosmos DB partitioning

Security & Quality: OWASP Top 10, JWT, OAuth2, RBAC, encryption, rate limiting, CORS, xUnit, NUnit, MSTest, TDD, Moq, SonarQube

Mobile: Xamarin.Forms, .NET MAUI, MVVM, MVVM Toolkit, offline-first, SQLite, push notifications, biometric authentication, native APIs

PROFESSIONAL EXPERIENCE

OUTLIER - Code Auditor & .NET Developer

January 2025 - Present | United States (Remote)

- Conduct comprehensive C# and .NET code audits against enterprise standards for security, performance, maintainability, and readability.
- Identify and document OWASP Top 10 issues, injection vulnerabilities, authentication flaws, race conditions, edge cases, and performance bottlenecks.
- Process 100+ code reviews per month and maintain a 92% approval rate across quality audits.
- Build reference-level solutions using Clean Code, SOLID, Factory, Singleton, and Strategy patterns for AI training datasets.
- Design unit-test coverage with xUnit and NUnit across happy-path, negative, boundary, and failure scenarios.
- Reduced pre-validation defect rates by 40%, reduced AI training dataset defect rates by 35%, and established quality standards for 50+ reviewers.

LOGISTA - Xamarin Developer / Senior Mobile Developer

April 2020 - November 2022 | Madrid, Spain

- Designed REST APIs consolidating data from 8+ heterogeneous sources using C#.NET Core with Clean Architecture, Repository Pattern, and Dependency Injection.
- Achieved sub-300ms P95 response times, supported 500+ retail stores and 5,000+ daily transactions, and reduced API latency 45% (300ms to 165ms).
- Eliminated 70% dependency on legacy systems through microservices refactoring and event-driven integrations; reduced downtime 60% and improved stability 40%.
- Resolved 25+ critical Xamarin/MAUI defects and reduced mobile crash rate from 8% to 0.3%; delivered offline-first SQLite, push notifications, biometrics, and native APIs.
- Deployed on Azure App Service with Azure DevOps CI/CD and maintained 2 releases per week; mobile rating 4.7/5.

TELUS DIGITAL - Xamarin Developer / Senior Developer

February 2016 - March 2019 | Bucharest, Romania

- Led migration from .NET MVC monolith to .NET Core microservices, migrating 150,000+ lines of legacy code with zero downtime.
- Improved throughput 20%, reduced CPU usage 35%, and reduced response time from 450ms to 360ms for 5M+ daily active users.
- Optimized 50+ SQL Server stored procedures; reduced average query response time 68% (2.5s to 800ms) and increased peak load capacity 45%.
- Mentored 6 junior developers in SQL Server optimization and .NET patterns; all 6 progressed to mid-level roles within 18 months.
- Generated \$500K+ in annual infrastructure savings through platform modernization and performance improvements.

KAYIENSOFT - Backend Developer / Senior Software Engineer

October 2010 - November 2015 | Maracaibo, Venezuela

- Designed 12+ enterprise desktop, web, and mobile solutions using layered and n-tier architecture.
- Implemented database security, encryption, RBAC, backup/recovery, and disaster-recovery practices; achieved RTO <4 hours and RPO <1 hour with zero data-loss incidents.
- Established coding standards, security guidelines, deployment procedures, architecture reviews, and compliance practices; reduced reported bugs 50%.
- Implemented CI for 8+ projects, reduced deployment time 87% (2 hours to 15 minutes), and built/led a technical team of 8+ developers.

EDUCATION

Universidad Nacional Experimental Politécnica de las Fuerzas Armadas (UNEFA) - Ingeniero de Sistemas | Information Technology Project Management | February 2010 - November 2015 | Maracaibo, Venezuela | Merit Recognition Diploma for Academic Excellence

Instituto Universitario Tecnológico de Maracaibo (IUTM) - Técnico Superior Universitario en Informática | 2005 - 2009 | Maracaibo, Venezuela

CERTIFICATIONS & CREDENTIALS

- IBM Master the Mainframe 2020 - Level 2 | Mainframe Architecture and Systems | 2020
- IBM Master the Mainframe 2020 - Level 3 | Advanced Mainframe Concepts and Enterprise Integration | 2020 | Finalist - Top 15 of 500+ global participants
- Windows Server 2019 Essential Training | Server Administration and Active Directory | 2019

AWARDS & PUBLICATIONS

- Merit Recognition Diploma for Educational Excellence (2015) - UNEFA.
- Best Community Service Project Award (2015) - COTATUR; regional tourism center application; reported +35% regional tourism impact.
- IBM Master the Mainframe 2020 Finalist - Top 15 of 500+ participants.
- Publications: "Design of Unmanned Aerial Systems Under SAE Aerodesign Standards" (2015) and "Database Optimization in High Concurrency Environments" (2019).

Languages: Spanish - Native/Bilingual | English - Full Professional Working Proficiency (CEFR B2-C1) | French - Limited Working Proficiency (CEFR A2-B1)

Availability: Remote-first | Flexible time zones | Async communication | Immediate availability | Open to relocation discussion | Valid work authorization for Europe and USA

Target Engagements: Senior .NET Developer | Software Architect | Solutions Architect (.NET/Azure) | Technical Lead (Backend/Mobile) | Azure-focused DevOps Engineer | Cloud Modernization Consultant
